ENERGY MANAGEMENT SYSTEM POLICY

Orgachem Kimya has accepted ensuring energy efficiency as an integral part of its activities. Our aim is to ensure conscious energy use while not compromising the quality of our products. The principles that Orgachem Kimya will apply in all its processes to ensure and maintain energy efficiency are as follows;

- Based on the principle of continuous development and improvement, to develop measures by identifying energy risks in order to plan our production activities that are compatible with the environment and prioritize human health, and to implement methods that will completely eliminate dangers and inefficiencies,
- To accept ensuring and improving energy efficiency as an integral part of its activities, beyond legal obligations,
- To consider and support environmental impacts and energy efficiency in the purchase of products and services and the realization of new projects and investments,
- Continuously improving energy performance and energy saving,
- To fulfill our legal responsibilities related to energy aspects and the risks that arise during our activities,
- Planning our development and implementation activities to prevent possible environmental risks and reduce emissions resulting from energy use,
- To reduce environmental pollution as an indicator of our sustainable development and to continuously improve energy efficiency by ensuring efficient use of energy and natural resources,
- To convey energy efficiency and environmental information about our products and solutions to relevant persons, institutions and organizations,
- Continuously monitoring the progress in goals and objectives and providing the necessary information and resources to achieve their realization.
- Systematically reviewing and updating Management Systems
- To fulfill our legal and other relevant compliance obligations within the framework of the legislation.

Ensuring and maintaining energy efficiency Orgachem Kimya Sanayi ve Ticaret A.Ş. It is our primary duty as employees.
