

QUALITY POLICY

Being one of the leading companies in Polymers and Specialty Chemicals Business it is our aim to serve our customers with top quality products and services.

Keeping customer satisfaction as our 1st priority, we are committed with a customer focused approach to provide fast and reliable services along with world class quality products.

We put a lot of efforts and investments into continuous Research& Development to provide our customers value added solutions and the most efficient products, guiding them as well sharing our vast experiences.

Having a modern and lean organizational structure, we are committed to continuous improvement of the processes, work flows, the efficiencies and minimizing the waste and scraps, enhance the systematic research and use of best preventive practices at all levels and ensure reliable risk management.

Through all our processes, we take a lot of care to be a reliable, consistent and environmentally friendly producer with a systematic approach following standards as the “ISO” and the “Responsible Care”.

For the success of our existence we believe in the importance of “Team Spirit” and “Corporate Values”. It is our most valuable resource to have a qualified and committed team of professionals to bring up and develop our new generation carrying the traditions forward.
